Imaging Workflow

Enterprise Imaging and Teleradiology Solutions

- Enterprise Imaging Solutions and teleradiology workflow enablers, ranging from simple smart routing, SSL-based DICOM and HL7 integration tools, all the way to enterprise-class.
- DCMSYS Workflow Unifier network appliance is a Enterprise Imaging Workflow Engine that facilitates imaging workflow automation immediate access to patient data across the Enterprise.

Resolution MD

THINK MOBILE FIRST

Image Access

CALGARY SCIENTIFIC

Clinical access to patient images & records anywhere, anytime, on any device

- Diagnostic, FDA-Level 2 approved viewer on mobile devices
- Leverage collaboration and remote consultations between practitioners, multiple facilities, and patients
- Anywhere, anytime, from any browser, OS, PACS, or EMR
- Fast access to studies because processing work is done on server-side, not the mobile device
- HIPAA-Compliant—no PHI downloaded

DICOM Management Software

Sorna

Simplify image sharing, burning, importing, converting, viewing and storing with Vertex

- **Acquire from any source;** PACS, CD/DVD, paper, images, film, video—and send **to any destination**
- Single-screen, drag-and-drop functionality and an intuitive interface makes your experience easier and more successful
- When you're ready to share data, simply burn it to a CD/DVD
- Works with existing hardware

DICOM & Medical Record CD Burners

Quickly burn large studies to CD or DVD

- Automatically labels the disk
- Low-cost, efficient, reliable DICOM DISC publishing system with custom DISC labeling
- Encryption and Password Protection options available
- Ask about our DISCO™ Digital Secure Copy solution— Burn medical records *and* DICOM on encrypted CD with the same CD burner

Diagnostic, Medical & Clinical Displays

Multiple manufacturer options—we can provide several quotes so you can get the most value for your budget

- Special pricing available for volume purchases
- HP & Dell approved workstations, PCI graphics cards and Consumer brand displays. Desk, wall & ceiling mounting systems

NEW PRODUCTS AND SOLUTIONS FOR IMAGING DEPARTMENTS

A solution for every budget. Customizable solutions allow for better work environments

- Improve morale, increase image reading productivity
- Room layout and desk configuration consulting
- Sit, Stand, or recline options available
- Reduce work-related injuries

Import & Digitize

Scanners, Digitizers, Software

Facilitate productivity

- Reviewer is a powerful software suite with a tool for every need - DICOMize, Scan, Store, Re-identify, Import, Export, Query, View, Burn, Print.

Wireless Headsets for Cath, EP, and IR

Now physicians and techs can communicate clearly, hands-free, in and out of the procedure area

- Better sound quality than intercom/speakers
- Operates independently of all existing equipment
- Can output to external speaker and connect to recording devices
- Ultra light-weight (users do not feel like they are wearing a headset)
