

Foundation Radiology serves 40+ sites is the first, multi-institutional radiology group accredited by the Joint Commission.

Strategy

Rolled out Unifier as the hub in its teleradiology network to receive exams from all image acquisition sources and route results back. Optimized routing workflows and triggers based on source, time and study type.

Unifier Features Stack

Intelligent routing, DMWL, Relevant Priors, Bi-directional HL7 Routing, Rapid DICOM

150% growth scaling from 650k to 1.5 million studies read per year

Adopted Unifier for automatic routing and complex pre-fetching of relevant priors

Improved
access to
historical
data

Accelerated
site acquisition

“Our staff spends less time fixing problems—now technology does it for them.”

- Chris Radi, Senior Vice President IT, Foundation Radiology
