**Imaging Workflow**

**Enterprise Imaging and Teleradiology Solutions**

- Enterprise Imaging Solutions and teleradiology workflow enablers, ranging from simple smart routing, SSL-based DICOM and HL7 integration tools, all the way to enterprise-class VNA.

- DCMSYS Workflow Unifier network appliance is an Enterprise Imaging Workflow Engine that facilitates imaging workflow automation for immediate access to patient data across the Enterprise.

NEW: Direct Image Sharing

**Securely Share Medical Data with Patients and Medical Professionals**

- Medical data is retained locally and streamed on demand through the Vertex Share cloud.
- Streaming minimizes upload bandwidth, eliminates cloud storage costs and significantly reduces security risks.
- DICOM studies, paper, and other digital content are combined by Vertex into a single package ready for sharing.
- Packaged data can be sent to multiple Destinations (CD, USB, ...) under the same job – eliminating duplication of effort.
- No account set up is necessary for recipients – simplify their process, save time and money.

**NEW: Direct Image Sharing**

**Share Securely**

**No CLOUD Upload**

**VERTEX Enterprise Elite**

Simplify image sharing, burning, importing, converting, viewing and storing with Vertex.

- Acquire from any source; PACS, CD/DVD, paper, images, film, video—and send to any destination
- Single-screen, drag-and-drop functionality and an intuitive interface makes your experience easier and more successful
- When you're ready to share data, simply burn it to a CD/DVD
- Works with existing hardware
