

New! Fixed UV-C Wall units now available.

COVID Disinfection for Imaging Suites and Procedure Rooms

These UV-C lights disinfect pathogens in just **45 seconds!**

Discounts may apply based off the # of rooms
- Call now for your special pricing

Fixed-Location Placement – One-time, initial installation means there’s no need to position fixtures with each use. Light fixtures are mounted to the wall or ceiling depending on the room. Four, six or eight RD™ UVC Fixed fixtures are used per OR/room —depending on the size and treatment time desired.

Patent Pending Remote Fixed Sure-Safe™ Sensors – Patented, hardwired remote sensors ensure the total amount of UVC light delivered from the fixtures is equal to or greater than what is required to inactivate the targeted pathogen.

Ultra-Fast Treatment Time – A location-specialized UVC dose is quickly delivered to target life-threatening, HAI pathogens and disinfect an entire room with higher efficacy. Rooms can be disinfected in as little as 45 seconds minimizing downtime between patient cases.

Touch-Screen Control Panel – The user-friendly control panel is located outside the OR/room for safe operation of system. A green/red disinfection complete light is located at the door.

| Package Description | Average Room Size | Room Range | Approximate Pricing |
|---|-------------------|--------------|---------------------|
| RD-Fx2-1 FIXTURE PACKAGE (X-Small - POD) | 10x12sf | up to 150sf. | \$8,394* |
